

**If you baby is ill,  
You can use gripe water.**

**If your cooking is bland,  
You can use salt water.**

**If you go to church,  
You must use holy water.**

**If you are in trouble,  
Keep your head above water.**

**If you like waterskiing,  
Don't play in a swimming pool.**

**Whatever happens, we like water.  
But when there is no more water,  
How will we manage ?**

**Water ? What for ?**

**By Louis SCHOUTITH**

Water is the biggest power in the world.

Tap water is essential for life,

Salt water can save food,

Holy water can help people.

Water is the biggest power in the world,

Scrub your plates clean with dishwater,

Watercolour helps us paint the world,

I have got watery eyes when I think

that water may disappear in the world.

By Hugo COSTA

**Water, essential resource for human beings.**

**In Africa, water flows on human cheeks**

**Because there isn't enough water for humans to see a rainbow.**

**They don't even have enough water to paint their land with watercolour.**

**They 'd like to have holy water**

**to forget about their old rites and let the rain fall by itself.**

**They really want to have waterfalls to purify themselves,**

**But especially to make misfortune disappear and forget it.**

**Africa lacks water**

**And Africa doesn't swim in happiness.**
