Comenius Project - TURKEY

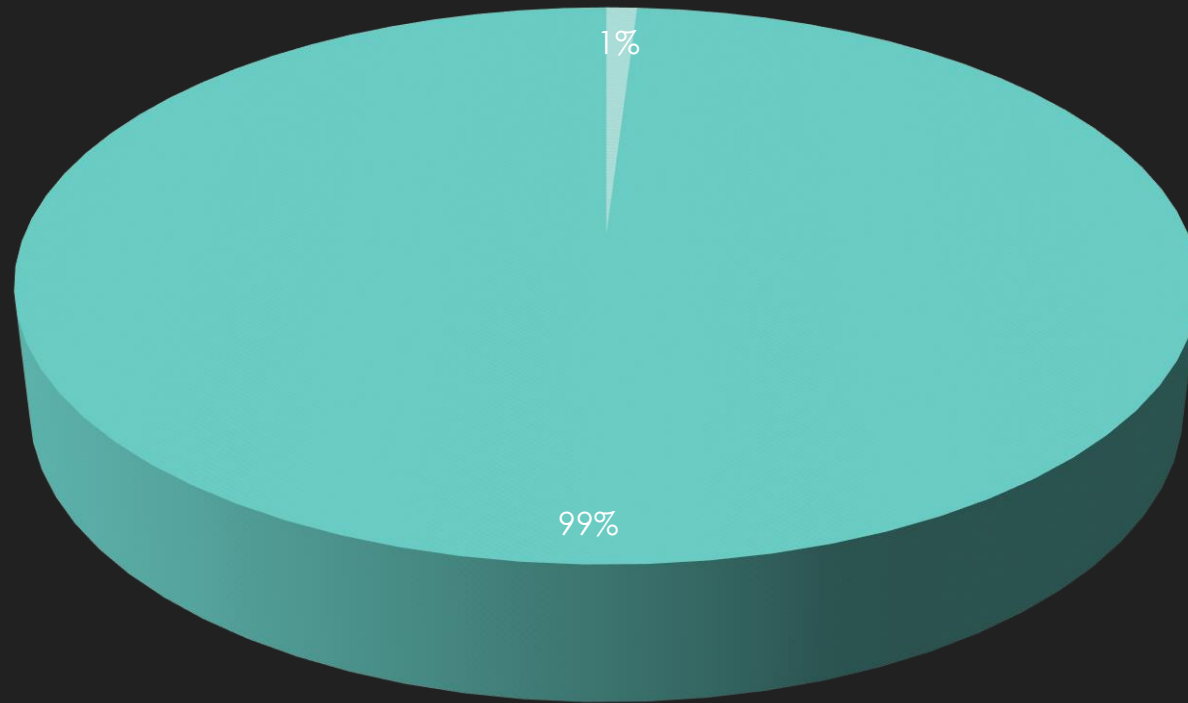

Agriculture uses 70% of the fresh water in the world

70%

1% of water in the world is fresh water.

Water in the world

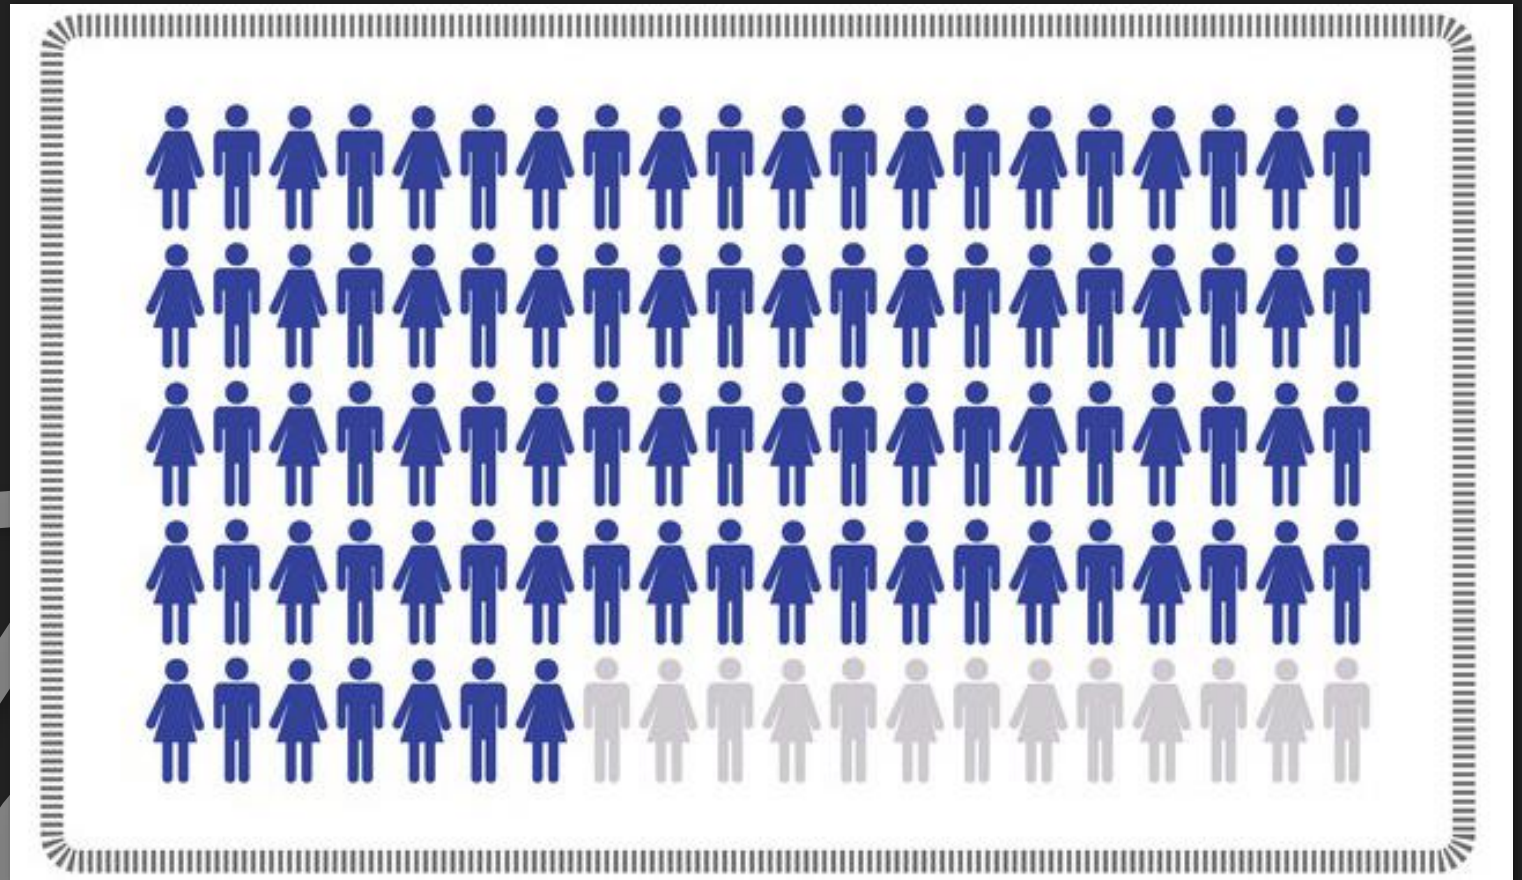

■ Fresh Water ■ Sea Water

1%

1.5 billion people have no access to drinkable water.

21%

20% of the global population consumes  
86% of the world's water resource.

20%  
86%

2,822 litres of water are consumed every second in the world.

2,822!

3,750,000 litres are used in an olympic swimming-pool.

3,750,000 l.

A baby is composed of 75% water.

It's true !

75%

The French consume 150 to 160 litres of water during a day.

A cartoon illustration of a French man with a large nose, wearing a brown beret, a green shirt with an orange scarf, and brown pants. He is holding a white wine glass. Behind him is a stylized French flag with blue, white, and red vertical stripes. A teal speech bubble next to him contains the text "Wine is better".

Wine is better

150 l.

To make 1 litre of alcohol, we need 100 litres of water.

100:1

A plastic bottle needs 7 litres of water for its creation.

7!
